EXPERIENCE

Psychologist website - skulskavladyslava.com

March - September 2024

I Designed, built, and deployed a comprehensive website using *Django*, *TailwindCSS* and *Docker*.

- **Dynamic Course Management System**: Developed an automatic course status management system with *Django-Celery* and *Redis*. This system allows users to purchase audio courses through the LiqPay payment gateway. It manages course completion tracking and automatically restricts access to the courses after a specified duration.
- **Responsive and Accessible Design**: Developed and implemented a responsive website using *TailwindCSS* and *Flowbite* that complies with A11y accessibility guidelines. This ensures that all users, regardless of ability, can navigate and benefit from the content.
- **Containerization with Docker**: Used Docker and Docker-Compose for containerization, facilitating seamless deployment and scalability.
- **Linux Server Deployment**: Hosted the website, PostgreSQL database, and media storage on DigitalOcean hosting platform.

TECHNICAL PROJECTS

Bookshop E-commerce Website - bookshelf-ochre.vercel.app

I Built an e-commerce bookshop website as a portfolio project, using *Django*, *HTML*, *CSS*, *JavaScript* and *Pico CSS*

- **Comprehensive E-commerce Functionality**: Implemented fully functional in-site search, registration systems, wishlist and cart.
- **Cart and Wishlist:** Built a cart and wishlist system which works both for authenticated (backed by the database) and guest (backed by cookies) users.
- **Secure Payment Integration**: Integrated PayPal for secure and efficient payment processing, automatically creating orders on payment success.

Portfolio - daniildavtian.vercel.app

I designed and developed my personal portfolio to showcase my skills and projects.

- **Elegant UI and Smooth UX:** Crafted a visually appealing and interactive interface with a focus on user experience.
- **Dark and Light Modes:** Developed dark and light mode options, allowing users to choose their preference, automatically selecting color mode depending on the user's system theme.

HARD SKILLS

Backend

- *Languages*: Python, Bash
- *Frameworks*: Django, Flask
- *Tools*: Linux, SQL, Docker, Docker-Compose

Frontend

- *Languages*: HTML, CSS, JavaScript (TypeScript)
- *Frameworks*: Svelte, TailwindCSS, GSAP, Bootstrap, Vite.js

Other

- *Tools*: Git, Github, Neovim (Vim), Tmux

SOFT SKILLS

Natural languages: English, Russian, Ukrainian

CS Education:

- "CS50's introduction to computer science", Harvard University
- "Learning Python" by Mark Lutz
